

# **Olinga Services**

## **Elevating Hygiene Standards for Fitness Facilities**

At Olinga Services, we understand that maintaining a pristine and hygienic environment is essential for gyms and fitness centres. With high foot traffic, shared equipment, and changing room facilities, ensuring a fresh and sanitary space is crucial for the health, safety, and confidence of your members and staff. A well-maintained environment not only enhances the member experience but also helps retain clientele and promote a positive reputation for your facility.

## Our Key Services:

### Hygiene & Protection for High-Touch Areas

Fitness facilities are filled with high-contact surfaces, from exercise machines and free weights to locker rooms, reception areas, and group training spaces. These areas require consistent attention protection that inhibits microbial growth for up to 30 days from application.

This ensures a safer environment for both staff and gym-goers.

### Nordic Chem 2.0 Surface Coating

We use **Nordic Chem 2.0 Surface Coating**, a proven antimicrobial solution that forms an invisible, odourless protective layer. This cutting-edge treatment is ideal for fitness centres, offering:

- **Continuous Protection** – Actively inhibits bacterial and fungal growth for 30 days.
- **Odour Reduction** – Prevents microbial activity that contributes to unpleasant smells.
- **Non-Toxic & Safe** – A water-based, non-corrosive solution that is safe for all surfaces, including exercise equipment, weights, and mats.
- **Asset Protection** – Extends the lifespan of gym equipment and flooring by preventing the absorption of sweat, uric acid, and bacteria.

### Advanced Application Techniques

Our certified team applies antimicrobial coatings using the **MotorScrubber STORM**—a lightweight backpack and wand spray system designed for precise and efficient treatment. This ensures thorough coverage of all gym surfaces, including high-touch equipment, door handles, lockers, and communal spaces.

To guarantee effectiveness, we conduct **instant testing** after application, verifying that the protective coating is fully active and remains effective throughout the 30-day period.

### Sustainable Waste & Hygiene Management

A clean gym extends beyond surface protection. Olinga Services also offers **comprehensive waste management solutions** designed specifically for fitness centres. Our eco-friendly approach helps reduce waste, optimise recycling efforts, and ensure a hygienic, clutter-free workout environment. Whether it's managing used towels, disposable wipes, or general waste, we tailor our solutions to keep your facility fresh and organised.

## Why Choose Olinga Services?

- **Industry Leaders** – Experts in facility hygiene with extensive experience across various sectors, including fitness and sports facilities.
- **Eco-Friendly Approach** – Our techniques and products prioritise sustainability, reducing environmental impact while maintaining top-tier hygiene.
- **Technology-Driven Solutions** – We integrate innovation and efficiency into our cleaning and hygiene management processes.
- **Customised Service** – We tailor our solutions to fit the unique needs of your fitness centre, ensuring an optimal experience for both members and staff.
- **Commitment to Excellence** – Our focus on high standards and attention to detail ensures a consistently fresh and welcoming environment for your members.

At Olinga Services, we are dedicated to delivering innovative hygiene and waste management solutions that help you maintain a clean, safe, and professional workout environment. Let us help you create a space where members feel confident, comfortable, and motivated to train.
